

OneSort® Prime dimensioning solution

A new dimension in data capture.

Lack of accurate data can lead to inefficient shipping management, improper parcel rating, revenue loss and decreased service levels. The manual process of parcel measurement and data entry is time consuming and error prone. The OneSort Prime from BlueCrest addresses these issues for a wide range of e-commerce, express logistics, supply chain and shipping center applications.

Instantly capture dimensions from virtually anything: boxes, flats, documents, poly-wrapped bags, mailing tubes and irregular shapes. You can add an integrated scale, utilise your existing scale or no scale at all. With no moving parts or dangerous lasers, there are no workplace safety concerns. The OneSort Prime dimensioner is easy to set up and integrate into your parcel management system, so you can begin realising increased productivity right from the start.
